

Call for Participants !!

AIJ International Architectural and Urban Design Workshop 2013 in TAMURA

“Urban and Rural Design in Tamura City toward Regeneration of "Fukushima" Region”

Architectural Institute of Japan (AIJ) will host an International Architectural and Urban Design Workshop in July, 2013. We will call for enthusiastic students from all over the world to participate.

Tamura is a city composed of beautiful towns and villages located on Abukuma highlands with abundant natural assets. In spite of the fact that the city has not been strongly affected by the radioactive contamination caused by the explosion of Fukushima 1 Nuclear Power Plant after the Great East Japan Earthquake on March 11th, 2011, it has lost its original local power till now.

This workshop will investigate how to enhance the revitalization of the city and empower Fukushima, and will propose several visions for its regeneration.

- **Date:** July 20(Sat) - 29(Mon), 2013
- **Venue:** Tamura city, Fukushima prefecture, Japan
- **Participants:** Maximum 40 students
